WHY
FASTAG BASED SOLUTION

With the vast growing influx of working population in the developed, industrially and technologically sound urban cities, an urgent need to make the cities smart is surmounted. The cities are made smart utilizing data sharing, AI, ML, analytics, and thousands of RFID tags and sensors.

Often most parking lots have witnessed long queues and agitated customers – both at entry and exit. This is a result of a manual process which involves manpower and cash transactions. GET SET PARK is an easy to deploy FASTag based solution which aims to make entry/exit automatic and fee collection digital.

PAIN POINTS
OF TRADITIONAL PARKING SYSTEM

Drive in/out is currently a manual, cash intensive and paper-based process. Due to infrastructure handling, customers often face unavoidable long queues where the time taken for cash collection averages 45 sec – 2 min.

Since the business is dependent on the operators/fee collectors, there are very high chances of pilferage, theft and false damage claims
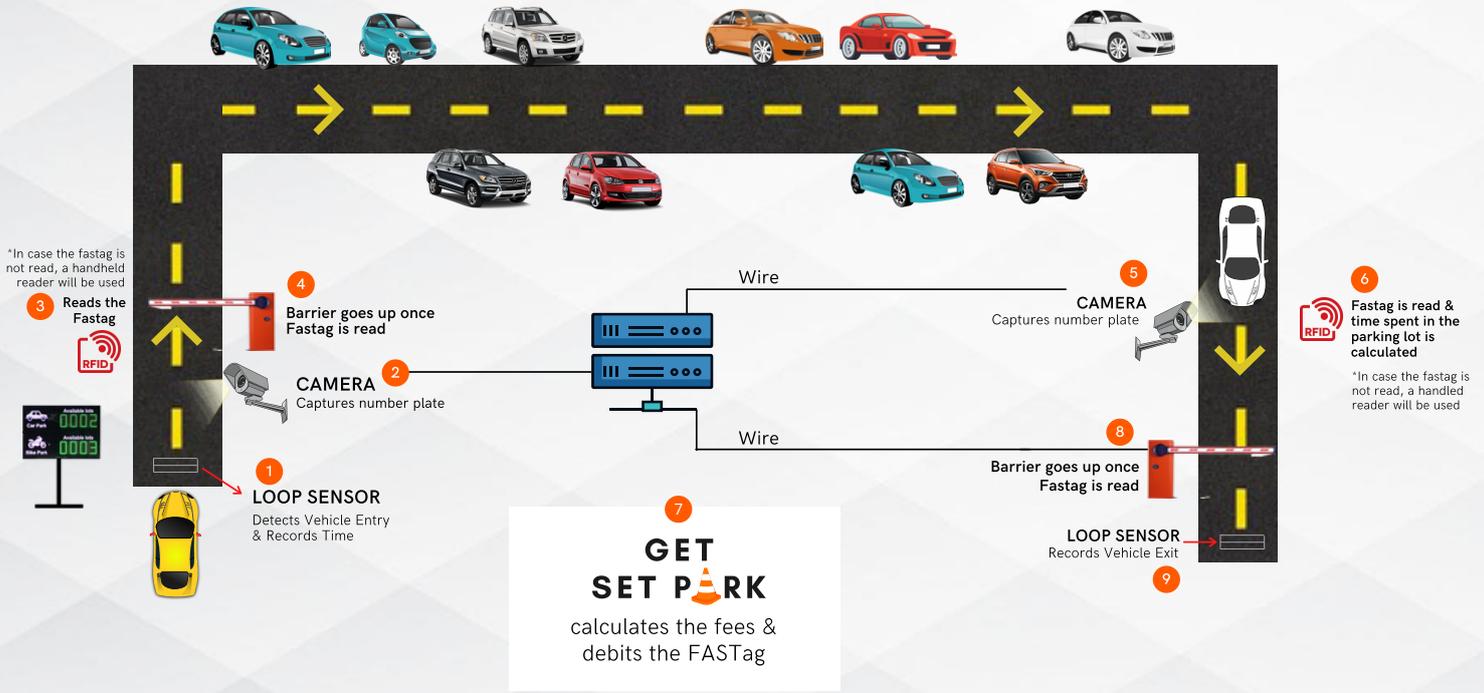

GET SET PARK
